

Artjoms Doiļnicins

Web Developer

Beyond my current role, I develop my front-end skills through hands-on work with **Vue.js**.

My latest project was a small application created to help my wife learn Latvian vocabulary. Additionally, I am involved in two collaborative side projects: a local educational platform and a gym training program app, both aimed at solving practical, real-world needs. All of these projects use the **Composition API** and **Tailwind CSS**, with a focus on reactive state management and maintainable, modular architecture.

2025 - Present - Magebit, Rīga Junior Web Developer

Development of e-commerce solutions using **Magento 2** and **Adobe Commerce** with a focus on **Hyvä** front-end optimization.

- Development of responsive interfaces utilizing **Tailwind CSS** and **Alpine.js**.
- Collaborative project delivery using **Docker** containers for environment consistency, alongside **Jira** and **GitHub** for task management and version control.
- Support active projects through bug fixes and feature development, utilizing Chrome **DevTools** and **Xdebug** for efficient troubleshooting.
- Work on newly initiated builds, ensuring clean implementation of core functionality.
- Contributed to three different cross-functional teams, applying both **Kanban** and **Scrum** methodologies on internal and billable projects.
- Communicate directly with clients to clarify requirements and provide updates.

2025 | Magebit, Rīga Bootcamp Participant

In a two-week intensive, our team of four collaborated to build a full e-commerce website using **Laravel**, moving from initial **Git** and **IDE setup** to advanced **Agent-Driven Development**. We integrated **Agile** methodologies and **Trello** for project planning while mastering technical skills in **authentication**, **UI/UX**, and **Tailwind CSS**. By applying these tools to implement core features like **search**, **PDP/PLP**, and **checkout system**, we successfully finalized a functional product and presented it to a live audience.

2019 - 2025 | TELUS Digital, Rīga Team Manager

Responsible manager for a team of over 20 employees across three different markets, along with a Quality Auditor team consisting of three individuals, one for each market.

- Engaging in daily cross-functional collaboration with PM, HR, IT and WFM departments with the primary objective of fulfilling customer requisites and achieving predetermined objectives.
- Designed and put into action various dashboards, while also automating everyday processes.
- Over a span of the past three years, consistently maintained the team's primary Key Performance Indicators at levels 5-6% above the established performance targets.

2015 - 2018 | Historic Royal Palaces, London Team Leader

Responsible team leader for over 10 employees, accountable for performance management, conflict handling, coaching, and quality control checks. Organised and lead meetings, training programs, and feedback sessions.
